

love Smooth Skin

At Love the Dentist we currently offer 2 types of anti-wrinkle procedures that can help minimise the signs of aging...

Wrinkle Softening

Wrinkle Softening Treatment dramatically softens facial expression lines and treatment for frown lines, temple lines, and crow feet/lines around the eyes. The creasing and contracting of the muscle over time causes deep and permanent wrinkles.

Even one treatment will relax facial expression lines leaving you looking younger and more refreshed.

The Treatment is injected using a disposable syringe with a very fine needle, with patients saying the most they feel is a slight sting. Wrinkle Softening Treatment is commonly used on the forehead where we often get crease lines, it can also be used on the crows feet around the eyes that usually come from smiling, on the frown lines in between the eyebrows, and if so desired, on the bunny lines of the nose.

Wrinkle Softening Treatment may last from 3 to 6 months and will eventually wear off. This allows the patient to test it to see if they like it and wish to continue with the treatment upon the need for renewal.

The Treatment is a widely known and highly used procedure, it is safe and has been used around the world for over a period of ten years.

Why our clients love coming to us...

"As soon as I came in all the staff and dentists were very welcoming and really, really friendly. It's just a generally nice and happy place to be and they have helped me get my confidence back."

We want you to
love going to the dentist

Facial Fillers or Dermal Fillers

As you get older collagen breaks down in your face and it can become flat and saggy. Fillers simply replace the collagen you lose through ageing, raising flatter areas and restoring your youthful look. They can also be used to enhance your existing facial features.

Once the treatment is gently injected into the target area it will pull in water to hydrate your skin. It also has antioxidant qualities providing instantly smoother skin with better results than any top brand moisturising cream. Results last between 6-12 months.

Please contact us for a free consultation.

Our Mission

We want to help our patients enjoy optimum levels of oral health by offering them a wide range of competitively priced dental treatments, all backed by the very best in service and care.
