

love White Teeth

If you'd love whiter teeth and a brighter smile we have a range of teeth whitening options available for you to choose from.

Whitening

We provide three ways to whiten your teeth.

- **Whitening Strips** - A very simple and yet effective formula of applying whitening strips to the outer edges of your teeth. In the comfort of your own home see results from as little as 30 minutes a day.
- **Personalised Mouth Tray** - For best results we use a special formulated gel to whiten your teeth. The gel is applied to your bespoke mouth tray, again in the comfort of your own home apply for an hour per day or overnight.
- **In Chair Whitening** - A combination of home whitening and in-surgery whitening.

Stain Removal

Polishing the teeth and using a special device to spray the teeth with a fine powder which does not damage the teeth but does remove stains can be used to allow the teeth to look brighter and whiter in one visit.

An alternative is to use Air Abrasion, this will help bring your teeth back to their natural colour. We use a mild abrasive powder and air to remove the stains.

Please contact us for a free consultation for any teeth whitening service.

Why our clients
love coming to us...

"Everything has improved greatly. Years ago it was a chore to go to the dentist, but here they are so good with you. You don't have to worry about anything. It's a really good experience."

We want you to
Love going to the dentist

Veneers & Bonding

A special type of material called composite can be added to the teeth instantly to change the appearance of teeth or close gaps.

Veneers are either porcelain or composite covers used to change the colour or alter the shape of your teeth to give you the best possible smile. Mostly veneers can be bonded directly to your teeth.

In some instances your tooth surface may need to be abraded to provide a more effective bond. Composite veneers can be made directly whilst you are in the chair.

Porcelain veneers require approximately 1 week, impressions are taken and sent to the laboratory. We provide you with a temporary veneer in this case.

Please contact us for a free consultation.

Our Mission

We want to help our patients enjoy optimum levels of oral health by offering them a wide range of competitively priced dental treatments, all backed by the very best in service and care.
